

Data Analyst

TechCorp Solutions | Hyderabad, India | Full-Time

About the Role

We are looking for a skilled Data Analyst to join our growing analytics team. You will work closely with product, engineering, and business teams to extract insights from large datasets and drive data-informed decisions across the organization.

Technical Skills Required

- Python (pandas, numpy, scikit-learn)
- SQL and relational database management
- Data visualization using Tableau or Power BI
- Machine Learning fundamentals
- Statistical analysis and hypothesis testing
- ETL pipeline development
- Cloud platforms: AWS or Google Cloud

Tools & Technologies

- Docker for containerization
- Git and GitHub for version control
- Jupyter Notebooks
- Apache Spark for large-scale data processing
- Tableau or Power BI for dashboards
- Figma (for collaborating with design teams)
- Jira for project tracking

Soft Skills

- Strong communication and presentation skills
- Critical thinking and problem solving
- Ability to work in cross-functional teams
- Attention to detail
- Time management and prioritization

Experience Requirements

2-4 years of experience in a data analyst or similar role. Experience working in an agile environment is preferred. A Bachelor's degree in Computer Science, Statistics, Mathematics, or a related field is required.

Nice to Have

- Experience with NLP or computer vision projects
- Familiarity with React or basic frontend development
- Knowledge of A/B testing methodologies
