## Professional Summary

Detail-oriented data enthusiast with 2 years of experience in business analysis and reporting. Proficient in Python scripting and Excel-based analysis. Comfortable working with structured data and generating reports for business stakeholders. Eager to grow into a full data analyst role.

## Technical Skills

- Python (basic pandas, numpy)
- Microsoft Excel (pivot tables, VLOOKUP, charts)
- Basic SQL (SELECT queries, JOINS)
- Google Sheets and data cleaning
- HTML/CSS (basic understanding)

## Tools

- Git and GitHub (basic commits and pulls)
- Jupyter Notebooks
- Microsoft Office Suite
- Slack and Trello for team collaboration

## Work Experience

### Business Analyst Intern — DataBridge Pvt. Ltd., Hyderabad

June 2023 – Present

- Created weekly Excel dashboards for sales and operations teams tracking KPIs
- Wrote basic Python scripts to automate repetitive data cleaning tasks
- Collaborated with senior analysts to interpret data trends for quarterly reports
- Maintained SQL query logs and assisted in database record verification

### Data Entry & Reporting Assistant — RetailMart, Hyderabad

January 2023 – May 2023

- Managed inventory data across multiple store branches using Excel
- Generated daily and weekly sales reports for store managers
- Identified data discrepancies and flagged them for correction

## Education

### Bachelor of Science in Computer Science

Osmania University, Hyderabad — Graduated 2022

## **Soft Skills**

- Strong attention to detail
- Team collaboration and communication
- Time management
- Willingness to learn new tools quickly

## **Projects**

### **Sales Data Cleaner (Python)**

Built a Python script using pandas to clean and standardize messy sales CSV files, reducing manual cleaning time by 60%.

### **Excel KPI Dashboard**

Designed an interactive Excel dashboard with slicers and pivot charts for a logistics company, used by a team of 10 analysts weekly.
